Professional Summary

Python Backend Developer with internship experience building FastAPI services, REST APIs, authentication systems, and PostgreSQL-backed workflows. Built end-to-end projects in FinTech transaction management, healthcare platforms, and NLP-based drug-safety analysis, with additional experience developing AI chatbots and voice-agent integrations. B.Tech CSE (AI/ML), 2026 graduate, seeking entry-level backend and software engineering roles.

Education

Bachelor of Technology in Computer Science and Engineering

Sri Venkateswara College of Engineering and Technology, Chittoor, India

Sep 2022 - May 2026 | Specialization: Artificial Intelligence and Machine Learning | CGPA: 7.95/10

Technical Skills

Languages: Python, SQL, JavaScript, C, HTML5, CSS3

Backend: FastAPI, Django, Flask, REST APIs, JWT, SQLAlchemy, PostgreSQL, API Integration

Web Development: React.js, Next.js, Node.js, Express.js, Responsive Web Design

Data and Infrastructure: MongoDB, MySQL, SQLite, Redis, Docker, Git, GitHub, Postman, Linux, CI/CD

AI and Machine Learning: Scikit-learn, Pandas, NumPy, NLP, TF-IDF, Random Forest, Streamlit, LLM API Integration, AI Agents, AI Chatbots, Voice AI Agents, Prompt Engineering

Core and Professional: OOP, Data Structures, Debugging, Authentication, Authorization, Agile, Problem-Solving, Communication, Adaptability

Experience

Python Developer Intern

Oct 2025 - Jan 2026

Zaalima Development / Remote

- Developed FastAPI backend services and PostgreSQL-backed REST endpoints for web application workflows.
- Implemented user-management and data-processing APIs and validated endpoint behavior using Postman.
- Optimized PostgreSQL queries and indexes to improve backend response performance.
- Debugged and tested backend features while collaborating through Git-based agile workflows.

Projects

SentinelStream - FinTech Transaction Monitoring Backend [\[GitHub Link\]](#)

2026

Python / FastAPI / PostgreSQL / Async SQLAlchemy / JWT / OpenAPI

- Built a FastAPI and PostgreSQL backend supporting registration, login, JWT authentication, and protected financial transaction workflows.
- Implemented secure password hashing and user-specific transaction creation and retrieval using asynchronous SQLAlchemy.
- Structured protected routes and database access around authenticated users.
- Documented and tested REST endpoints through Swagger/OpenAPI.

CuraMind AI - Healthcare Diagnostic Platform [\[GitHub Link\]](#)

Oct 2025 - Jan 2026

Python / Django / FastAPI / Celery / Redis / PostgreSQL / MongoDB / Docker

- Developed a healthcare backend using Django, FastAPI, Celery, Redis, PostgreSQL, and MongoDB.
- Implemented authentication, role-based access, patient-doctor workflows, medical records, and operational health endpoints.
- Organized asynchronous workflows for preprocessing, inference, reports, and notifications.
- Containerized backend services with Docker and configured service health checks.

Adverse Drug Effect Detection and Safety Analytics [\[GitHub Link\]](#)

Sep 2025 - Nov 2025

Python / NLP / TF-IDF / Random Forest / Scikit-learn / Pandas / Streamlit

- Built an end-to-end NLP pipeline to identify possible adverse-effect signals from patient-written drug reviews.
- Cleaned and transformed review text using TF-IDF feature extraction and trained a Random Forest classifier.
- Performed exploratory analysis and model evaluation and persisted the trained model and vectorizer.
- Developed a Streamlit interface for real-time adverse-effect predictions.

Certifications

AI and Machine Learning Internship (6 months), SmartBridge/APSCHE, 2026

[\[View Certificate\]](#)

Python Full Stack Internship (6 weeks), ExcelR/APSCHE, 2024

[\[View Certificate\]](#)

Artificial Intelligence and Machine Learning, L&T EduTech, 2024

[\[View Certificate\]](#)

Data Engineering Foundation, L&T EduTech, 2024

[\[View Certificate\]](#)

Programming for Data Analytics (Python), L&T EduTech, 2024

[\[View Certificate\]](#)

Getting Started with Data Analytics on AWS, AWS/edX, 2024
