Kurnool, Andhra Pradesh, India

SUMMARY

Computer Science and Computer Engineering student who builds full-stack applications using Python, Java, and JavaScript. Write clean, scalable code with strong problem-solving skills. Boosted performance by 40 percent and cut bugs by 25 percent. Work effectively in teams or independently under pressure.

EDUCATION

Bachelor of Technology in Computer Science and Engineering Sep 2022 – May 2026
Sri Venkateswara College of Engineering and Technology Chittoor, India
– Major in Computer Science and Computer Engineering with specialization in Artificial Intelligence and Machine Learning

SKILLS

Languages: Python, Java, JavaScript, C++, C, SQL, HTML5, CSS3, PHP
Frameworks: FastAPI, Django, Flask, Spring Boot, Node.js, Express.js, React.js, AngularJS
Databases: PostgreSQL, MongoDB, Redis, MySQL
Tools: Git, GitHub, Docker, VS Code, Postman, Linux, Swagger
Practices: Agile, Scrum, REST APIs, Microservices, TDD, CI/CD, OOP, Debugging
Security: Security Systems, Authentication, Encryption, Access Control
ML: Scikit-learn, Pandas, NumPy, TensorFlow, PyTorch
Soft Skills: Problem-Solving, Communication, Leadership, Adaptability

EXPERIENCE

Python Developer Intern Oct 2025 – Jan 2026
Zaalima Development Remote
– Developed backend services with Python and FastAPI, writing clean and scalable code
– Reduced query time by 30 percent through PostgreSQL optimization and indexing
– Cut bug reports by 25 percent through automated testing and debugging
– Collaborated with managers and engineers in agile sprints maintaining 99 percent uptime

PROJECTS

CuraMind AI - Healthcare Diagnostic Platform Oct 2025 – Jan 2026
Python — Django — HTML5 — CSS3 — JavaScript — Machine Learning
– Built AI-powered healthcare platform using Django for medical diagnosis
– Applied problem-solving skills to design ML models for disease prediction
– Implemented security systems with authentication and access control
– Created RESTful APIs for real-time health monitoring
– Link: github.com/Kaif0333/curamind-ai

SentinelStream - Fraud Detection System Aug 2025 – Nov 2025
Python — FastAPI — PostgreSQL — Redis — Celery — Machine Learning
– Engineered fraud detection system processing 1000 plus transactions per minute
– Trained ML algorithms achieving 94 percent accuracy in fraud detection
– Deployed Redis caching and Celery queues for 500 plus concurrent requests
– Optimized database improving response time by 40 percent
– Link: github.com/Kaif0333/sentinelstream-fraud-detection

CERTIFICATIONS

- **Full Stack Developer Program** – GUVI-HCL (Aug 2025 - Nov 2025)
